72-USB-IO4 Module

Mini USB to USB Cable

Removable Phoenix Connectors

Mini USB Jack

Contact Closure Jumpers for N/O, N/C operation

Removable Phoenix Connectors

Relay Jumper Position

Part Number 72-USB-IO4

USB Controlled 4 Analog Inputs, 4 Dry Relay Contacts

The Calrad 72-USB-IO4 module is a very simple and inexpensive method to control up to 4 devices with dry contacts and also read input signals from external sources. Trigger motorized lifts, garage doors, electric gates. Detect door contact closures, use motion detectors for activity triggers, push buttons to trigger any xlobby event, music lighting, etc. , use a DC power display to indicate equipment rack power status or that a piece of equipment is powered on. The possibilities are endless. Jumpers change the logic of N/O, N/C for the relay contacts. Ships with all relays in N/O position. This device is easily accessible in the xLobby project menu.
