4 Zone Audio Instructions

Controls Overlay Menu

In order for the xLobby Multi-Zone audio to operate in your system you must have the 40-ZA4 module installed and properly configured. Any key on the xLobby remote can be programed to perform any event in xlobby. Buttons 1-4 are setup to access each zone independently and the current zone is indicated at the top of the controls menu, button 0 will launch a random playlist for each zone. other buttons and macro events can be programmed as needed for example 1. shuffle, playlists, IP Radio stations. Please contact Calrad for further details on button event creation and programming these buttons.
