Dimmer Package

Control UPB using xLobbys Touchscreen interface, IR Remote or calendar based scheduled events.

Reliable UPB Lighting Technology:

UPB™ uses low frequency, spread spectrum technology which produces a very strong signal. In addition, UPB™ uses true 2-way communications, allowing devices to reveal their status to each other. This feedback, that commands have been successfully executed, results in reliable communications—greater than 99% accurate!

No programming necessary when bundled with xLobby, custom programming available at purchase or by remote access over the internet. Install the lighting control dimmers plugin the Pim control module to xLobby and the lighting system is ready to use.
